

YAGNESH BHANANI

PHP / LARAVEL DEVELOPER

Bhavnagar, Gujarat | +91 8530213085 | yagneshbhanani@gmail.com | www.yagneshbhanani.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Web Developer specializing in the PHP and Laravel ecosystem, with extensive experience designing database architectures, building RESTful APIs, and integrating complex frontends with third-party Node.js backends. Adept at taking full-stack ownership of projects from concept to deployment, ensuring secure, high-performance, and scalable solutions for enterprise and SaaS applications.

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, React (Basics), JavaScript

Database: MySQL, SQLite, MongoDB (Basic)

API & Integration: RESTful APIs, JSON, AJAX, jQuery, Postman

Web & Tools: HTML, CSS, Bootstrap, Tailwind, Git/GitHub, XAMPP, VS Code, Antigravity IDE.

WORK EXPERIENCE

Web Developer | 2023 – Present

Insomniacs Digital Private Limited, Bhavnagar

- **Property Ecosystem & Community Engagement Platform:** Designed the relational database architecture and engineered robust RESTful APIs using Laravel, executing seamless end-to-end backend integrations.
- **Gatekeeper App:** Developed a custom Laravel-based admin panel and built specialized APIs to manage scalable QR code generation, allocation, and scanning functionalities.
- **Real Estate B2B & Enterprise CMS Engine:** Led frontend integration for large-scale platforms using PHP, jQuery, and AJAX to seamlessly bind dynamic UI components with external Node.js backend services.
- Migrated foundational codebases to advanced JSON API architecture, successfully bridging data gaps and ensuring high system availability across cross-functional teams of up to 22 members.

Web Developer | 2023

Om Data Entry India, Ahmedabad

- **Custom HRMS System:** Single-handedly architected and developed a comprehensive HRMS platform, taking full-stack ownership of frontend and backend development using Core PHP and MySQL.
- Executed complete project lifecycles from initial architecture planning to live server deployment, ensuring stable and secure employee data management.
- Performed rigorous debugging and troubleshooting protocols to resolve critical system issues, minimizing downtime and maintaining continuous business operations.

KEY PROJECTS & FULL-STACK DEVELOPMENT

(View full source code and expanded project gallery at www.yagneshbhanani.com)

- **Cratory – Invoicing & Finance Management SaaS:** Engineered a modern, fully-featured finance management platform acting as sole full-stack developer, utilizing Laravel 13, Livewire 3, Tailwind CSS, MySQL, and SQLite.
- **Developer Portfolio & Custom CMS:** Developed a high-performance web platform from scratch using Laravel and Tailwind CSS, featuring a custom integrated admin dashboard that optimized dynamic content management.
